ADJECTIVES OF NUMBER

These adjectives state how many people or things are meant or in what order a person or a thing stands. They answer the question: How many?

Adjectives Of number are of three kinds.

A. Definite Numeral Adjectives

These adjectives tell us the exact number of people or things. They are of two kinds:

i. Cardinals:

state the number of people or things . One, three, fifty, eighty-nine are examples of cardinals.

Examples: There are six boys in the library.
I have five pens.

ii. Ordinals :

state the order of people or things in a series. First, second, third, last are examples of ordinals.

Examples: Mamta is the second tallest girl in our class.
Praveen lives on the fifth floor.

B.Indefinite Numeral Adjectives:

An indefinite numeral adjective is such an adjective that does not provide the exact number of objects or else because it provides the information.

- All, any, some, few, several, no, most, certain.

Examples:

All the students are present in the classroom.

Some of them ran away after the incident.

Several people came to yesterday's function.
